Logan Heath
Frontend Developer

Reno, NV | +1 (775) 507-9556 | loganheath90@gmail.com | LinkedIn | Github

Frontend Developer with over a year of experience building responsive, user-focused web apps. Skilled in React, API integration, and clean, maintainable code. Strong collaborator with a passion for learning and adapting in fast-paced environments.

Professional Experience

NFT Market
Remote | *May 2025 - June 2025*

- Built a multi-page NFT site with React and React Router DOM, increasing user retention by 30%.
- Integrated real-time NFT data and live countdowns via external APIs, boosting transaction speed by 25% and sales conversions by 15%.
- Designed a homepage with dual NFT carousels, raising engagement by 40% and session duration by 50%.
- Implemented responsive design for 95% mobile compatibility, reducing bounce rates by 20%.

Skinstric AI
Remote | *June 2025 - July 2025*

- Built a fully responsive AI-powered web app for demographic prediction (age, race, sex) from photos, achieving 85% accuracy.
- Added device camera and gallery upload features, improving user submissions by 60%.
- Used React and React Router DOM for seamless navigation, reducing page load times by 35%.
- Optimized image processing, cutting prediction times by 50% and increasing user satisfaction by 30%.

Projects (Personal)

Search API Project: Live Demo | Github
Movie Search Platform

- Developed a dynamic movie search site using an external API for real-time results and improved user experience.
- Implemented responsive design and dynamic routing for smooth navigation and detailed movie info on any device.
- Used React Hooks for efficient state management and cleaner, maintainable code.

Book Shopping Website: Live Demo | Github
Book Shopping Website

- Created an interactive online bookstore where users can browse and manage their shopping experience.
- Designed responsive product pages with dynamic routing for smooth navigation.
- Enabled real-time price calculations to boost user engagement and satisfaction.
